Please provide a description of the methods used to solicit community input on community needs (attach additional pages if necessary): During the first half of 2013 a Community Needs assessment was conducted by The Memorial Hospital, Vosotong Nurse Home Care and Hospice of Carroll County, White Mountain Community Health Center and the White Mountain Valley Community Health Council (WMVCHC). Assessment data for the CHNA was collected using the Community Health Needs Assessment Toolkit. The goal of the CHNA was to gain a better understanding of both the needs and assets of our community, and to collaborate more effectively in making measureable health improvements. In addition to the secondary data collected input from the Patient Advisory Council at Memorial Hospital, members of the White Mountain Valley Community Health Council, staff and board of the Carroll County Public Health Coalition and other community resources. The combined results from the 2010 and 1013 CHNA will be used by the VNHCH and WMVCHC to set priority needs, develop strategies and establish an implementation plan to address the community needs. Collaboration within the

community and continued identification of stakeholders and key resources are an essential part of the ongoing assessment and addressing of the needs of our community. VNHCH is responsible to carrying out the implementation plan as outlined in the CHNA although collaboration and sharing of information and resources remain a priority in moving ahead with a measureable implementation plan.
